

RUBBAIR DOOR

RubbaAir Doors have replaced conventional wooden doors with their "WHITE POLYKOR" impact traffic doors at The NHS Royal Brighton and Sussex University Hospital. The doors were installed in the busy A & E and Resuscitation Departments. The doors are designed to take impact especially from beds and trolleys, additionally they require low maintenance, thus releasing expensive maintenance staff for more pressing and important healthcare related projects.

Eckel House, Half Moon Street, Bagshot, Surrey, GU19 5AL, UK.
